

Wisemo Release Note

Remote Desktop Guest for iOS

Build : 2018-295

Release

Product: Remote Desktop Guest for iOS (iPad & iPhone)
Version: 17
Build: 2018-295
Shipping from: 31.10.2018
Release Type: New build

Introduction

This is a build update to version 17 which fixes a couple of bugs, especially annoying for iPhoneX users.

New features and enhancements

None

Bugs fixed

- On iPhones with a notch, for example iPhoneX, the auto scroll feature during remote control did not work correctly. The problem only occurred when scrolling towards the edges of the screen, where the round corners and notch are located.
- Deleting the last entry in the phonebook could crash the Guest instead of showing an empty phonebook.
